**Front-end:** HTML, CSS, JavaScript, TypeScript, React

**Back-end:** Django, MySQL, MongoDB, Express, Node.js

**Other:** Git, GitHub, version control, AWS lambda, AWS REST API

## SOFT SKILLS

TEAMWORK

EFFICIENCY

MULTITASKING

## INTERESTS

- Technology And Innovation: Keeping up with the latest advancements in technology and exploring new tools and frameworks for web development.
- Travelling

## PERSONAL PROJECTS

- AWS: I made a live data monitoring system for a solar power plant which involved aws lambda function and mongodb
- Database Design: This project involved designing a database for a fictional company. I used MySQL to create the database and populate it with data. I also wrote SQL queries to retrieve data from the database.
- Django Web Framework: This project involved building a web application using the Django web framework. I used Django to create the user interface, the database, and the back-end logic.
- The Full Stack: This project involved building a full-stack web application. I used Python, Django, and MySQL to create the back-end, and HTML, CSS, and JavaScript to create the front-end.
